9292 app

9292 is a very handy app to download when you go to Amsterdam. It shows you how to get from A to B using public transport. You can choose your departure location using GPS, a known location (such as a station or landmark), a bus or tram stop or an address. It also shows you the walking route when you have to walk from the bus stop to your hotel, for example. It will also show you how long your trip will take including the walking time. We highly recommend downloading this app.
